Only MODERATE grade in 5,047 results: GS MEAN_REVERSION 5m made +10.0% while holding lost 15.0%, a +25 pt edge that passed the robustness tests. It is still Rejected: the policy needs +50 pts.

Edges exist, but none survives the robustness gates

BEST RESULT PER STOCK: BEAT BUY & HOLD BY (PTS)

RAG found real context for 3 stocks, nothing for 2

TSLA — Partial

- Q2 FY2026 revenue $28.236B; EPS 0.33 vs 0.50 consensus (miss)
- $2.00B equity investment in SpaceX (CEO-affiliated)
- $87M Megapack revenue from SpaceX in Q1 FY2026
- SEC, DOJ, NHTSA, NTSB information requests

GS — Partial

- Q2 FY2026 revenue conflict inside FMP: $38.431B (income statement) vs $20.338B (earnings feed)
- EPS 20.98 vs 14.47 consensus (beat)
- Legacy 1MDB matter in the filing notes

MSFT — Partial

- Q4 FY2026 revenue $90.007B; EPS 4.74 vs 4.24 consensus (beat)
- Cybersecurity: the main disclosed risk
- $13B OpenAI funding commitment, $11.6B funded

MU, SNDK — Missing

- FMP plan blocks both tickers (HTTP 402)
- Only a company profile: no financials, risks, guidance or management evidence

20	questions asked
10	Not found (all guidance)
0	DB conflicts after audit
0	claims from model memory

Verdict: HYBRID. FMP numbers plus document RAG

What RAG added

- Filing-disclosed risks and litigation a backtest cannot see
- Governance facts: TSLA's CEO-affiliated SpaceX stake
- A data-quality flag: GS revenue disagrees inside FMP
- Honest gaps: Not found instead of guessed answers

What it did not do

- Change any verdict or rank (by design)
- Provide guidance or management commentary for any stock
- Cover MU or SNDK (FMP plan blocks both tickers)
- Prove decision-level value: that needs the A/B evaluation
