FTMO · AI TRADING AGENT

An AI agent that finds the stocks and strategies that beat Buy & Hold

An autonomous research agent built on Claude. It screens NASDAQ continuously, creates and selects trading strategies, backtests them against Buy & Hold, and delivers a ranked list of what works.

WHAT KIND OF AGENT

Autonomous

Runs continuously — no one has to start it

Tool-using

Drives our market data, strategy library and backtest engine

Research only

Recommends with evidence; people decide trades

1 NASDAQ screening → 2 AI strategy → 3 Backtesting → 4 Buy & Hold comparison → 5 Ranked results

It analyses and recommends. People decide what is traded.

ARCHITECTURE & DATA FLOW

One agent, four tools, a continuous data flow

DATA IN

NASDAQ market data
Daily prices and volume

Earnings data
Earnings dates, company facts

Strategies
Library + the team's own

The target
Beat Buy & Hold by 50+ pts

THE AGENT

Claude AI agent
Plans every run · decides what to test next · explains every result

Screener
Liquidity, volatility, trend

Strategy library
Tested rules + AI-made variants

Backtest engine
10 years, real trading costs

Results database
Every run recorded and ranked

Runs continuously — new data in, rankings update

RESULTS OUT

Ranked leaderboard
Best stocks and strategies, a verdict for each

Plain-English reasons
Why each stock passed or failed

Excel export
Refreshed as new data arrives

THE WORKFLOW

What the agent does at each step

1 NASDAQ screening

AGENT DOES

Pulls every NASDAQ stock and screens them in parallel, nonstop: liquidity, volatility, trend.

REAL EXAMPLE

NVDA trades $25B a day

OUTPUT

A shortlist of tradable stocks

2 AI strategy

AGENT DOES

Tries every library and team strategy on each stock, creates tuned variants, keeps the best.

REAL EXAMPLE

555 strategy tests in one run

OUTPUT

Best strategies per stock

3 Backtesting

AGENT DOES

Replays each strategy over 10 years of daily prices with realistic trading costs.

REAL EXAMPLE

2,500 trading days per test

OUTPUT

Return, risk and trade record

4 Buy & Hold comparison

AGENT DOES

Compares with simply holding the stock — same period, money and costs — then stress-tests it.

REAL EXAMPLE

PYPL: +543% vs +40%

OUTPUT

Pass or fail vs the target

5 Ranked results

AGENT DOES

Ranks every stock with a verdict and a plain-English reason; refreshes as data arrives.

REAL EXAMPLE

NKE ranked #1: Recommended

OUTPUT

Leaderboard + Excel

BUY & HOLD COMPARISON

How a strategy earns a Recommended verdict

TEST 1 · BEAT BUY & HOLD BY THE TARGET

Target: beat Buy & Hold by 50+ points over the same 10 years, same money, same costs

NKE — Mean reversion
Strategy **+45%**
Buy & Hold **−32%**
+77 pts PASSES

PYPL — Trend regime
Strategy **+543%**
Buy & Hold **+40%**
+504 pts PASSES

TEST 2 · PROVE IT IS REAL

	NKE	PYPL
Wins on data it never saw	Pass +181 pts	Fail −21 pts
Survives higher trading costs	Pass 8 ticks	Pass 8 ticks
Not one lucky trade	Pass top trade 8%	Fail top trade 43%
Wins in most periods	Pass 3 of 5	Fail 2 of 5

NKE → Recommended
Passes both tests

PYPL → Watch
Beats the target, fails Test 2

Rejected
Below the target or behind Buy & Hold

FINAL OUTPUT

A ranked leaderboard, with a verdict for every stock

#	Stock	On FTMO	Best strategy	Return	Buy & Hold	Beat by	Robustness	Verdict
1	**NKE · NYSE**	Yes	Mean reversion	+45%	−32%	**+77 pts**	Passed	**Recommended**
2	**PYPL · NASDAQ**	No	Trend regime	+543%	+40%	**+504 pts**	Not robust	**Watch**
3	**INTC · NASDAQ**	Yes	Volatility breakout	+249%	+229%	**+20 pts**	Not robust	**Rejected: below target**
4	**PEP · NASDAQ**	No	Mean reversion	+27%	+21%	**+6 pts**	Not robust	**Rejected: below target**
5	**MSFT · NASDAQ**	Yes	Hold until broken	+559%	+799%	**−240 pts**	—	**Rejected: behind B&H**
6	**NVDA · NASDAQ**	Yes	200-day swing	+10,816%	+13,541%	**−2,725 pts**	—	**Rejected: behind B&H**

Ranked leaderboard
Refreshed as new data arrives

A reason for every stock
Why it passed, or why not

Excel export
Ready for the team

Real research results: 10 years of daily prices; same money and costs for strategy and Buy & Hold. Target: beat Buy & Hold by 50+ points, then pass the robustness checks.
