A stock-ranking dashboard, not a trading system

Scores 93 large-cap stocks on 5 lenses, blends them into one score (0–100) and sorts them into priority buckets.

93	5	0	May '26
stocks	scoring lenses	backtests	data snapshot

RESULT TODAY

0	20	65	7	1
High	Medium	Low	Watchlist	Avoid

Top 5: **GOOG · NVDA · TSM · MAR · ARM**

Built by Rahul Yalamanchili (mentor: Sreeni) with Claude Cowork · github.com/Rahulchili/Research-and-Ranking-Dashboard-V1

THE 5 LENSES · WEIGHT IN THE SCORE

Fundamentals 35%

Revenue growth, margins, free cash flow vs sector

Technicals 35%

200-day average, RSI, MACD, ADX, momentum

Management 15%

Did they deliver what they promised on calls?

Options 10%

Implied volatility, put/call ratio, skew

Valuation 5%

Forward P/E vs peers, value-trap check

Files in → five scores → a ranked website

1 INPUTS
files added by hand, per stock

- Price history (xlsx)
- Options chain (xlsx)
- Earnings-call transcripts
- SEC filings (10-K / 10-Q)
- FactSet peer data

2 PIPELINE
add_ticker.py · 8 steps

- Technicals: SMA, RSI, MACD, ATR
- Fundamentals by quarter
- Promises found in transcripts → Beat / Hit / Miss
- Options: IV, put/call, skew
- Peer valuation + 1,300+ charts

3 SCORING
5 lens scores 0–100

- Weighted composite (35/35/15/10/5)
- Bucket: High ≥85 · Medium ≥70 · Low ≥55 · Watchlist ≥40 · Avoid
- "Why this score" text per lens

4 OUTPUT
static website (GitHub Pages)

- Leaderboard + Excel / CSV
- 7 tabs per stock
- Stance, bull / bear case: auto-drafted, then edited by hand

Quality gate make verify: lint, type checks, tests, schema, secret scan, write-only-to-data/ guard

× No trading rules
no buy / sell signals are tested

× No backtests
no comparison with Buy & Hold

× No AI at runtime
Claude Cowork built it; the pipeline is plain Python

× Manual refresh
prices dated 13–22 May 2026

Different question, so different answers

THE DASHBOARD ASKS

Which companies look strongest right now?

judgement scores from data

FTMO_MT5 ASKS

Which trading rule beats simply holding the stock, and does it survive stress tests?

tested rules on our engine

SAME STOCK, BOTH SYSTEMS · real results

GOOG

DASHBOARD	FTMO_MT5
#1 of 93	Rejected
80.8 · Medium	Best rule +617% vs holding +752%

Strong company — holding it beat every rule

NFLX

DASHBOARD	FTMO_MT5
#84 of 93	#1 · Watch
56.1 · Low	Best rule +698% vs holding +430%

Weaker score — but a regime-switch rule beat holding it (FRAGILE)

Also the same: both rank stocks with a reason, use 200-day average / RSI / ADX, export to Excel, have tests and guard rails, and were built with Claude.

Two tools, built for different jobs

	Research Dashboard (Rahul)	FTMO_MT5 research agent
Goal	Rank companies by quality & setup	Find rules that beat Buy & Hold
Stocks	93 hand-picked, NYSE + NASDAQ	3,139 NASDAQ, screened automatically → 705 pass
Data	FactSet, SEC filings, transcripts, options — files added by hand	Yahoo prices + NASDAQ listing — fetched automatically
Method	5 weighted scores → one 0–100 score	Backtests on our engine, 10 timeframes, vs Buy & Hold
Strategies	None — a written stance per stock	41 tested: 15 built-in · 2 team · 24 AI-designed
Proof	None (no backtests)	2,018 backtests · 136 stress tests
AI	Claude Cowork used to build it	Claude agent runs the research 24/7, research tools only
Freshness	Snapshot, 13–22 May 2026	Live — reruns on a schedule
Output	Static website + Excel / CSV	FTMO app dashboard + Excel + Google Sheet + reports
Result now	0 High · 20 Medium · 65 Low	0 Recommended · 24 Watch
Places trades?	No	No — research only; execution kept separate

5 · KEY TAKEAWAYS FOR FTMO

Borrow its quality lenses, keep our testing

Quality filter first

Check revenue growth, margins and cash flow (SEC filings, free) before backtesting.

Our screen today checks only liquidity, price, volatility and history.

Management credibility

Did the company deliver what it promised on earnings calls? Beat / Hit / Miss.

Needs a transcript source — the repo uses files added by hand.

Options context

Implied volatility and put/call as a risk flag beside each verdict.

Our broker hub already reads option chains.

DON'T COPY

- Scores maintained by hand
- A one-off data snapshot
- Buy / sell stances that were never tested

PRACTICAL NEXT STEP

Run our agent on the 57 dashboard stocks that are NASDAQ-listed, and show their quality score next to our tested verdict.

The other 36 (mostly NYSE) need our universe extended first.
